About Me

I am a proactive and solution-oriented individual who embarked on my journey before university, gaining valuable experience in the restaurant business, primarily as a manager. Throughout my professional career, I have cultivated a strong sense of empathy and self-criticism, translating these qualities into practical habits across all aspects of life.

Driven by a passion for continuous improvement, I am a quick learner, constantly seeking opportunities to enhance my skillset. My dedication to personal growth has led me to the exciting world of Front-End Development, where I thrive in crafting engaging and user-friendly web experiences.

Personal

Birthday: 06/01/1987   Language: Turkish, English

Nationality: Turkish   Address: Çankaya/Ankara

Relationship: Married

Education

İstanbul University (AUZEF)

Bachelors Degree, Management Information Systems

Started at 2021

Hacettepe University

Bachelors Degree, Hydrogeological Engineering

2010-2015

Certificates

- **The Complete JavaScript Course by Jonas Schmedtmann** to see the certificate
  This comprehensive JavaScript course, led by Jonas Schmedtmann, provided me with a strong foundation in JavaScript programming. I gained proficiency in working with DOM manipulation, asynchronous programming, and building interactive web applications.
- **The Beginner Frontend Web Development Path by patika.dev** to see the certificate
  This path enabled me to acquire fundamental Frontend Web Development skills. I improved my practical knowledge in HTML, CSS, and JavaScript, and learned how to create websites.
- **React - The Complete Guide 2023 (incl. React Router & Redux) by Academind** to see the certificate
  This comprehensive React course, including React Router and Redux, helped me master the React library and build complex, scalable web applications. I gained hands-on experience in state management, routing, and building reusable components.

- **Version Controls: Git and GitHub by BTK Akademi** to see the [certificate](#)
  In this training, I learned popular version control systems like Git and GitHub. I acquired the ability to effectively manage my code, collaborate, and track my projects.

Projects

- **Next.js-Meetups**

The "NextJS Meetups" project showcases my expertise in front-end development, user interface design, and real-time data integration, highlighting my ability to create engaging web applications that cater to user needs while staying at the forefront of modern web development practices.

Utilized Firebase for real-time data integration, ensuring up-to-date event information. Implemented responsive design principles to optimize the user experience on different devices. Designed an intuitive and user-centric interface, enhancing overall usability.

Skills Applied: React, Next.js, Firebase, Responsive Design, User Experience (UX) Design.

[Live demo](#)

- **Cuckoo's – Online food ordering app**

"Cuckoo's," an online food ordering app. This project exemplifies my commitment to applying modern web development techniques to create functional and engaging user interfaces. The app features a minimalist menu with three delectable options, each fetching data seamlessly from Firebase.

"Cuckoo's" demonstrates my proficiency in React, employing its power to craft an intuitive and responsive user interface that adapts flawlessly to various devices and screen sizes. Through seamless integration with Firebase, the app ensures real-time retrieval of menu data, guaranteeing access to the latest culinary offerings. Prioritizing user experience, I designed a sleek and user-centric interface that simplifies browsing and order placement.

Skills Applied: React, Firebase, Responsive Design, User Experience (UX) Design.

[Live demo](#)

- **TodoApp**
  Created my first React project for managing tasks with filter options.
  Enabled users to mark and remove completed tasks.

Key Skills

- HTML
- CSS
- JavaScript
- Sass

- React.js
- Git
- Bootstrap
- Next.js

- Github
- TypeScript

Hobbies and Interests

Beyond coding and web development;

Books: A dedicated sci-fi enthusiast, I find joy in exploring imaginative worlds within the pages of a good book. While my heart belongs to sci-fi, I embrace a wide range of genres, allowing me to savor diverse perspectives and captivating stories.

Problem-Solving: My knack for creative problem-solving extends beyond coding. Whether it's fixing gadgets or tackling DIY projects, I thrive on finding ingenious solutions, showcasing adaptability and a can-do attitude.

Theatre: With four years of experience in a theatre group, I honed my skills as both an actor and a director's assistant. This background highlights my ability to collaborate, think on my feet, and contribute to dynamic creative endeavors.

My diverse interests reflect a blend of creativity, adaptability, and an unquenchable thirst for knowledge. Just as I craft digital experiences, I approach life with a zest for crafting a rich and fulfilling journey.
